The Head of Department
Department of Software Engineering
Adventist University of Central Africa (AUCA)

Subject: Letter of Institutional Support for the Final Year Project "SkillSense: AI-Based National Skills Demand Intelligence System for Employability Prediction"

Dear Sir/Madam,

The Ministry of Public Service and Labour (MIFOTRA) acknowledges receipt of the concept note entitled "**SkillSense: AI-Based National Skills Demand Intelligence System for Employability Prediction,**" submitted by the final-year Software Engineering students of the Adventist University of Central Africa (AUCA).

The Ministry appreciates the initiative undertaken by the students to develop an innovative solution aimed at supporting workforce planning, skills demand forecasting, and evidence-based decision-making through the application of Artificial Intelligence. The proposed project addresses issues that are relevant to Rwanda's national priorities in human capital development, labour market intelligence, employability, and digital transformation. MIFOTRA is pleased to express its institutional support for this academic project and has no objection to its implementation as a final-year capstone project under the supervision of the Department of Software Engineering.

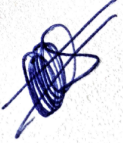

It should be noted that this letter constitutes institutional recognition and support for the academic undertaking only. It does not constitute an endorsement, certification, or adoption of the proposed system, nor does it imply a commitment by the Ministry to provide confidential or restricted data.

Please accept the assurances of our highest consideration.

Yours faithfully,

Clement Kabiligi

**Permanent Secretary
Ministry of Public Service and Labour**
